Your alarms

Where it is	Kind smoke/heat/CO	Battery changed	Replace by expiry date

If an alarm goes off

- **Smoke or heat alarm:** get everyone out to your meeting point. Call **999 or 112**. Stay out.
- **Carbon monoxide alarm:** open doors and windows, turn off fuel-burning appliances and get everyone out into fresh air. Feeling unwell? See a doctor.
- **Smell gas?** Call 1800 20 50 50.

Smoke and heat alarms

- At least one on every floor. For the most protection, one in every room except the kitchen, bathroom and garage, with a heat alarm in the kitchen.
- On the ceiling, near the middle of the room. Vacuum the casing every 6 months. Change the battery every year. Replace before the expiry date.
- Hard of hearing, or money tight? Ask your local fire authority about a free alarm (**Community Smoke Alarm Scheme**).

Carbon monoxide (CO) alarms

- One in every room with a fuel-burning appliance, and one within 5 m of every bedroom.
- Look for **EN 50291**, the CE mark and an independent certification mark. Replace it at the end of its life. It is not a substitute for a smoke alarm.
- Questions about CO: **1800 89 89 89** or carbonmonoxide.ie.
